## Project 2a Write Up

<https://cekloeck.github.io/Carson-Kloeck-Project2a/index.html>

- a) I incorporated my focus into my HTML site through images and text that reflected my collective's vision and accomplishments. I used bright colors and images that highlighted that the collective is supposed to be fun and exciting. I chose traditionally feminine colors and symbols to reflect the focus SAFE&SOUND has on redefining femininity; though the collective is for all women and non-binary people, feminine people in the music industry are commonly seen as lesser than masculine people so I felt that it was important to embrace femininity in my web design.
- b) OUTLINE
  - i) INDEX
    - 1) Meta Data
    - 2) <div>SSC Logo
    - 3) Nav Bar
    - 4) <section> frontpage
      - (a) Description
      - (b) Venus Logo
    - 5) <section> comingup
      - (a) Upcoming plans
    - 6) <section> Contact
      - (a) Email
    - 7) <footer>
  - ii) ABOUT US
    - 1) Meta Data
    - 2) <div>SSC Logo
    - 3) Nav Bar
    - 4) <section>aboutus
      - (a) Mission statement
      - (b) Background
    - 5) <div>debut show image
      - (a) Image from debut show
    - 6) <footer>
- c) I really enjoyed this project, it reminded me of when I used to code in HTML for my Tumblr blog in middle school. I remembered a lot more HTML than I thought I did so many of the principles came naturally. However, I did struggle to get my website uploaded to github. I had trouble keeping the github file updated but was eventually able to figure it out. The About Us section has an image that will not load on my computer but I later tried the same link on a different computer and the image loaded. Coding in HTML was very different from the site builder. I'm glad I now have a good knowledge of how to use both tools.
